## **DETAILED ACTION**

### **STATUS**

Claims 22,24,25, 31-33,36,38-45, 56 and 57 are pending.

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5 and 11-15 are drawn to access with a credential, classified in class 726 subclass 5.
  - II. Claims 6-10 and 16-40 are drawn to secure transaction with authentication, classified in class 705 subclass 51.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed in invention II does not require the particulars of the subcombination as claimed in inventions I such as a identifying remote appliance to the central server using an encryption key.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
